

Fishbook Wireframe

Overall Objective:

- Allow users to track fishing progress and angling accomplishments.
- Provide historical catch data to help users identify patterns and inform future fishing trips.
- Provide historical, current, and forecasted weather and water conditions to help users plan future fishing trips.

Page 1 - Fishing Conditions

Purpose:

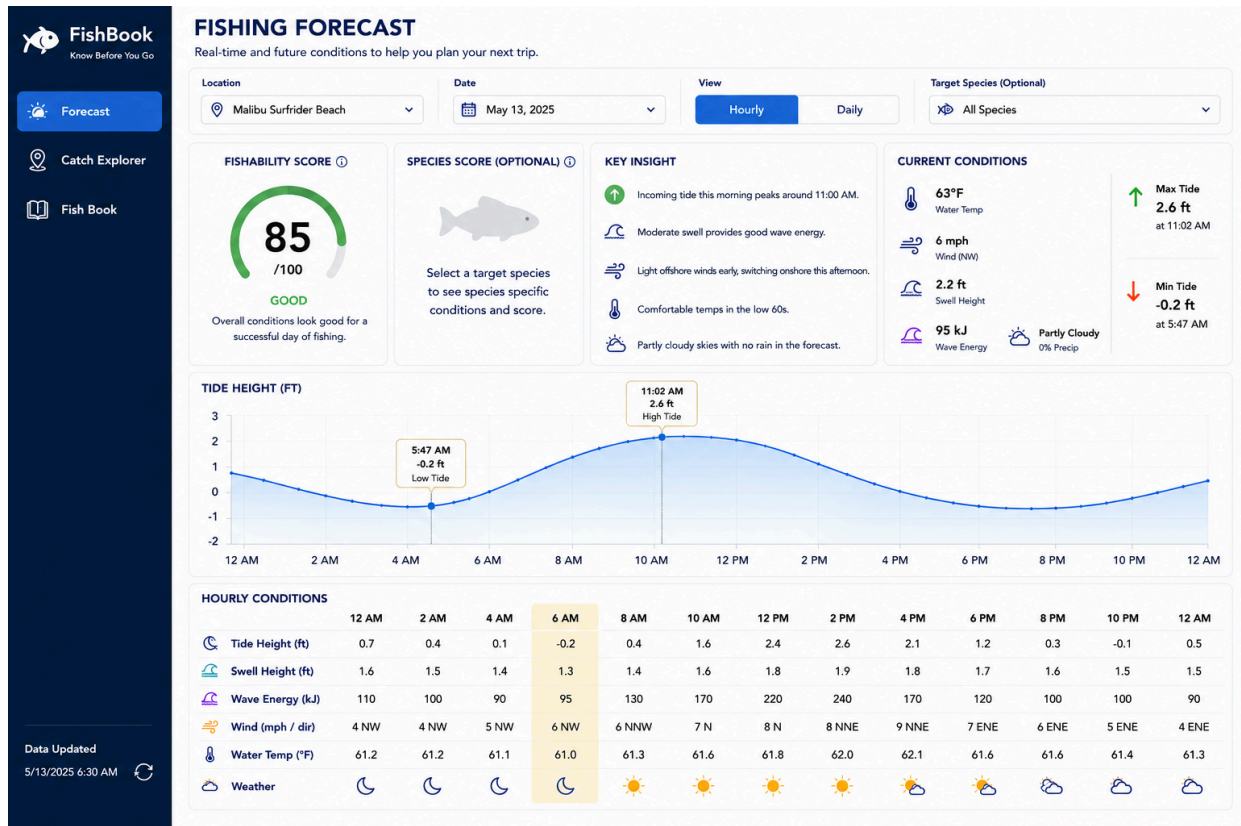

Provide historical, current, and forecasted weather and water conditions to help anglers plan future fishing sessions.

Visuals:

- Tide chart displaying changes in tide height over time.
- Conditions table displaying factors such as swell height, wave energy, water temperature, wind speed and direction, and weather.
- Summary of forecasted fishing conditions.

Interactions:

- Select a fishing location to view location-specific conditions.
- Select a date to review current or future conditions.

Page 2 - Catch Explorer

Purpose:

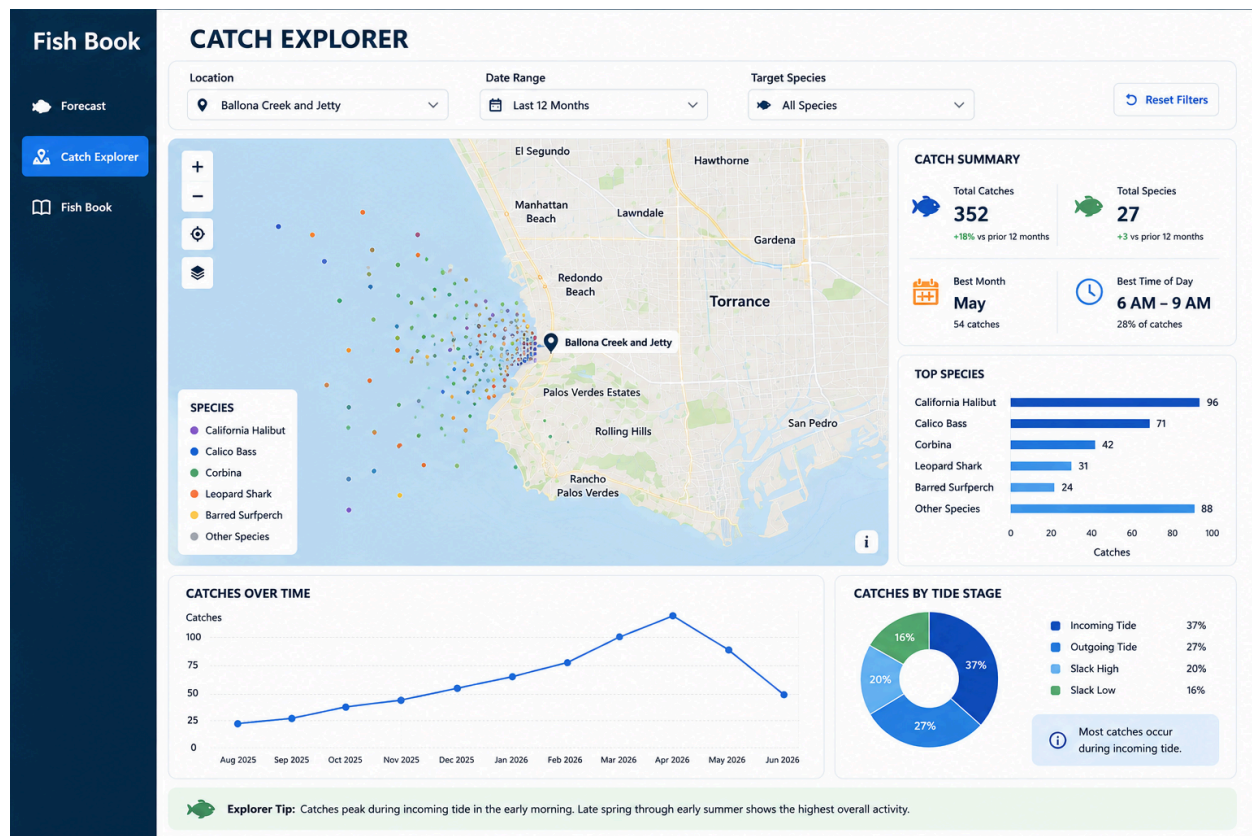

Provide an interactive view of historical catches to help anglers identify patterns that can inform future fishing sessions.

Visuals:

- Interactive coastline map showing locations where fish have been caught.
- Catch metadata such as species, tide stage, swell, weather, lure/bait, and time.
- Summary KPIs including total catches, species caught, and catches per session.
- Supporting visuals showing catch patterns over time and across fishing conditions.

Interactions:

- Filter catch history by date range, location, and species.
- Explore catch locations interactively on the map.
- Use filters and visual interactions to investigate how catch outcomes vary across environmental conditions and fishing methods.

Page 3 - Collection

Purpose:

Provide a personal catalog of caught species and individual catch history.

Visuals:

- Grid-style catalog displaying species the angler has caught.
- Species-level summary including total catches, locations, average size, and personal best.
- Individual catch history including date/time, location, size, offering, and environmental conditions.
- Summary of conditions associated with catches for the selected species.

Interactions:

- Browse the collection of caught species.
- Select a species to view its detailed catch history and statistics.

- Filter or navigate the collection to explore individual species.
